Understanding Social Media's Effect

on Youth Mental Health

Dr. Libby Matile Milkovich, MD

Our Digital  
Media World  
is Uniquely  
Personal

# Objectives

- Analyze the Multidimensional Effect of Social Media
- Identify Both Positive and Negative Outcomes
- Develop Empathetic and Strategic Approaches

**ROUTER LEVEL**

# Summary

- Problematic internet use is a known risk factor for experiencing harm from social media
- There are multiple perspectives to consider when supporting youth social media use. Think social ecological model!
- Relationships are the most critical protective factor in promoting healthy social media use
