IoT Training Opportunity: for Law Enforcement and Prosecutors Only!

Internet of Things: Considerations in Investigations & Community Awareness

January 14, 2026 | Sioux Falls, SD

The Internet of Things (IoT) encompasses a complex network of data, demanding a thorough understanding and careful planning for its retrieval, management, and subsequent examination within the context of criminal investigations. From this training program, learn comprehensive exploration of the diverse devices and interconnected systems responsible for generating valuable data. Participants will actively engage in live demonstrations, acquiring practical skills for extracting and analyzing this data using non-forensic methods. Security and privacy concerns that citizens may encounter will be addressed and strategies for Law Enforcement to engage with their communities effectively will be provided.
