TRAINING ANNOUNCEMENT

Subconscious Communication® for Detecting Deception

At the conclusion of this training our participants will:

- Understand the definition of Subconscious Communication®, deception and the role in communication
- Recognize the existence of 115 identified lies in the daily contact in our society
- Discover the types of lies, liars, and the biological, physiological and psychological factors involved
- Learn the basic rules in detecting deception in verbal communication during interpersonal conversations
- Recognize the key verbal phrases that indicate deception is present and have responses to counter them
- Be given the basic indicators of deception when applying the evaluation in the manner of speech
- Discover how to successfully use body language for rapport building and deception detection
- Realize the importance of using their own communication skills to encourage cooperation from others
- Analyze statements more successfully and utilize affirmative tactics to solicit truthful responses
- Articulate more successfully their process to avoid court challenges and to establish reasonable suspicion
- Appreciate the need to conduct oneself ethically and professionally in gathering information from others
