Field Search Software is deployed from a USB by officers in the field. The software provides a quick and efficient examination of a suspect's computer. The report is saved back onto the USB drive which each student receives. Easy to use.

Pre-view and confront offenders with recovered digital evidence while on scene. Field Search Software is available free of charge to government agencies. Field Search Software was initially grant funded by the (NIJ NLECTC-CCOE). All students will receive a licensed copy of this software included at no cost. No hidden costs- or- re-occurring fees. **Cost is \$495.00 per student.**

All students will receive a licensed copy of Field Search (V5.2) software. Officers receive a 4GB USB drive with all course material, 15+ additional easy to use investigative software tools (Hashing tools, GEO tag tracing, etc.). Examine peripheral devices (USB drives, CD's, external hard drives, tablets, SD, Micro Sims Cards, multi-card readers, etc.) which may provide critical case information.

Officers will learn how to search a suspect's computer using the latest proven technology. We provide the venue, instruction, certification, mobile computer lab, complete with case studies to aid with the hands-on learning experience. Students will be able to use the tools in the field by the end of the class. Preview different operating systems; Windows 11, 10, etc. (Windows & some MAC's). Field Search will find, display, and build a court worthy report:

- Real-Time result viewing
- Tag and comment evidence
- Share with investigators, prosecutors, etc.
- Shareable Report Viewer
- Export formats: HTML, CSV, and PDF

- Files sitting in the recycle bin (user believes they deleted these files, date and time deleted).
- Keyword Search looks for email address, victim names, credit card, or account numbers.
- URL records (Explorer, Edge, Chrome, Firefox, Opera, etc.) even deleted, (some limitations WIN 11).
- Images (Pictures) several different formats-JPEG, GIF, BMT, PNG, and many more.
- Videos (Movies) several different formats-WMV, MPEG, FLV etc.

Investigate the proliferation of child sexual abuse material. Investigators need technology tools that empower front-line investigators to make rapid determinations on-scene with field search software.
