In this one-day course, law enforcement officers will gain proficiency in utilizing Timing Advance area search technology to effectively investigate crimes within specific geographic areas. Participants will be introduced to the fundamental principles of Timing Advance technology, enabling them to create targeted search areas, analyze geofence data, and interpret visual information crucial for criminal investigations. The course will also cover integration strategies with other investigative tools and techniques to solve intricate criminal cases.

Course Objectives:

- Understand the foundational concepts of Timing Advance area search technology.
- Learn how to strategically create and define search areas using Timing Advance technology.
- Gain proficiency in analyzing geofence data to identify potential leads and suspects.
- Develop skills in interpreting and visualizing Timing Advance data for investigative purposes.
- Explore advanced techniques for integrating Timing Advance technology with other investigative tools.
- Apply learned methodologies to solve complex criminal cases efficiently and effectively.

Upon completion of this course, participants will be equipped with the knowledge and practical skills necessary to effectively employ Timing Advance area search technology in their investigative work, thereby enhancing their ability to solve complex criminal cases and contribute to public safety.

INSTRUCTOR: We only use active law enforcement, who are currently using these techniques in their daily roles as our instructors. By doing this, it keeps the material up to date and immediately applicable for the students. The instructors can use their own active cases to reinforce the techniques taught in the class. You can read all our instructor biographies on our website.
