

88 TACTICAL | ELITE TRAINING

RED DOT SIGHTED HANDGUN INSTRUCTOR

88 Tactical's 3-day Red Dot Sighted RDS Equipped Handgun Instructor Course will prepare students to implement red dot sighted pistols into their agency. Most RDS handgun training is designed to increase performance on the range, which does not always translate well in complex real-world situations. This course will cover equipment, training techniques, policies and procedures, case law, RDS effectiveness and human behavior under duress.

This RDS Equipped Handgun Instructor Course is designed to give the instructor proficiency in using the RDS equipped handguns and provide the ability to transfer this knowledge and apply it back to their agency. Students will learn how to recognize threats and apply dot presentation based on three threat initiatives while applying superior tactics.

REGISTRATION:
