After an applicant has met all admission requirements, the applicant will be sent an email link of the study guide for the reciprocity/reactivation exam. There is a fee of **\$100.00** to sit for the exam. Testing dates are listed on the NLETC website and appointments for testing must be made no later than 7 days prior to the scheduled testing date. On the day of testing, the applicant will participate in two tests. The first one is a physical test. PSAC has established that an applicant must complete the JTA Physical Job Task testing.

The second exam is a cognitive test. The study guide provided covers the material on the cognitive examination.

An applicant will be given two opportunities to pass each of the exams. If an applicant fails to pass either of the exam(s) and still desires basic certification, the applicant may apply for admission into basic certification training.

The application process will take approximately 3-4 weeks to complete. Please plan accordingly.

TO THE EXAMINER:

The medical exam is divided into two sections. Part A provides an explanation of each component of the exam, which will be conducted. A Licensed Physician, Physician's Assistant or Advanced Practice Registered Nurse (APRN) may conduct the examination.

Part A is the Medical History Statement to be completed by the applicant. Part B is the Medical Examination Report to be completed by the examiner.

MEDICAL SELECTION GUIDELINES (POTENTIALLY DISQUALIFYING CONDITIONS)

First, the following conditions, although explicitly related to one or more essential tasks, are not necessarily an exclusive list. If the examining physician identifies a condition not included below, which he or she feels could adversely affect the ability of the candidate to perform any or all of the essential tasks of a law enforcement officer, that condition should be noted.

Second, because many of the tasks below involve physical exertion and danger in their performance, we ask that the physician, to the extent possible, assess, on an individualized basis, whether the candidate is able to perform the essential tasks of the job safely, and whether his/her inability may pose a "direct threat to the health and safety of himself/herself or others". As EEOC guidance suggests, "this assessment shall be based on a reasonable medical judgment that relies on the most current medical knowledge and/or the best available objective evidence". In particular, the examining physician should consider, in identifying a "direct threat", whether "in performing the particular functions of a job would result in a high probability of substantial harm" to the individual or others. This determination must be based on individualized, factual data rather than "stereotypic or patronizing assumptions". Generalized fears about risks cannot be used by an employer to disqualify an individual with a disability.

SECTION ONE – EYES AND VISION

VISUAL ACUITY

All candidates must have binocular vision. Corrected vision shall be at least 20/20 (Snellen) in the weaker eye and shall be for both eyes together.

Use of Glasses: Due to the empirical evidence that glasses may dislodge, break, fog, etc., during the performance of essential tasks, it is expected that candidates who wear glasses shall meet an uncorrected far acuity standard of not worse than 20/100. Furthermore, if the candidate uses glasses and passes the uncorrected acuity standard, it is expected that the employing agency will ensure that the candidate uses athletic head straps to minimize the dangers attendant to losing one's glasses.

Use of Contact Lenses: If the candidate uses soft contact lenses and the employing agency monitors the use of SCLs then the uncorrected standard can be waived. This waiver does not extend to users of hard lenses due to the increased possibilities of dislodgement or particulate entrapment.

Examples of Essential Tasks Requiring Visual Acuity:

- 1) Low light searches
- 2) Use of deadly force

- 3) High speed vehicle operation (day and night)
- 4) Physical struggle with resisting persons

DEPTH PERCEPTION

Depth perception shall be sufficient to demonstrate normal stereo depth perception with or without correction to the standard of 80 ARC seconds. (A standard office test of peripheral vision is an acceptable alternative for initial testing, e.g., Titmus Testing Machine.)

Examples of Essential Tasks Requiring Depth Perception:

- 1) Operate vehicle at high speeds
- 2) Use deadly force
- 3) Engage in physical combat

COLOR VISION

The preferred test to be used is the 24 plate edition of the Ishihara Test (1974 or subsequent equivalent edition). (However, if necessary, the 14 plate Ishihara is an acceptable alternative.) Generally, perception of color should be deemed acceptable if the candidate correctly reads at least nine (9) or more of the first 13 plates of the 24-Plate Edition of the Ishihara Test. As described in the test manual, this test should be given under lighting conditions approximating a daylight illuminated room (indirect daylight), and not primarily using tungsten or fluorescent lamps. The MacBeth Easel Lamp of the True Daylight Illuminator (TDI), which meets the standards specified by the International Commission of Illumination, or equivalent, may be used, e.g., True Daylight Illuminator.

If the candidate's color perception is deemed unacceptable through the use of said test, and he/she believes the results to be incorrect, then such individual must be informed that he/she has recourse to additional testing and a facility identified where he/she may, at his/her own expense, take the Farnsworth D-15 Test.

Examples of Essential Tasks Requiring Color Vision:

- 1) Recognize colors of suspect clothing
- 2) Recognize colors of vehicles, license plates, etc.
- 3) Search crime scenes
- 4) Use deadly force

PERIPHERAL VISION

The presence of either monocular or significant bilateral field defects in a patrol officer are likely to create a direct threat to self or others. Significant field defects include cases in which the horizontal binocular field is restricted to less than 120 degrees in each eye, total vertical field is less than 100 degrees, or when large scotomas are present.

Examples of Essential Tasks Requiring Peripheral Vision:

- 1) Encounter suspects approaching from far left or far right
- 2) Encounter hostile crowd surrounding an officer
- 3) Operating vehicle, at high speed and observe activity/condition to either side
- 4) Execute self-defense maneuver
- 5) Use deadly force

NIGHT BLINDNESS

A history of night blindness should be evaluated to determine candidate's ability to perform essential tasks at night or in low light settings. This is not on the examination form. If it is necessary to review, include it in the Explanation section.

REFRACTIVE SURGERY

If candidate has undergone such procedure, a Night Blindness Test must be conducted by a qualified ophthalmologist. The examiner should also consider adverse side effects such as sensitivity to glare, reduced corneal strength, etc. This is not on the examination form. If it is necessary for review, include it on the Explanation section.

Examples of Essential Tasks Requiring Night Vision:

- 1) Use deadly force in low light
- 2) Recognize suspects in low light circumstances
- 3) Operate vehicle (at high speeds) in inclement weather at night for extended periods of time
- 4) Conduct searches of grounds and buildings in low light or dark

THE EXAMINER SHALL NOTE ANY ADDITIONAL CONDITION(S) OR MEDICATION PROFILE(S) THAT MAY INTERFERE WITH THE CANDIDATE'S ABILITY TO PERFORM ANY OF THE ESSENTIAL TASKS OF THE LAW ENFORCEMENT OFFICER'S JOB.

These may include:

Cataracts

Chronic External Eye Disease

Chronic Inflammation

- Choroiditis
- Optic Neuritis
- Retinitis
- Uveitis

Diplopia

Eyelid Disorder

Glaucoma

Macular Degeneration

Retinal Detachment

Stereopsis

Strabismus

Nystagmus

SECTION TWO – EARS AND HEARING

HEARING ACUITY

The candidate must have aided or unaided hearing in both ears sufficient to perform essential tasks without posing a direct threat to themselves or others. An acceptable test is a whispered conversation at 15 feet or, preferably, using an audiometer, the candidate should have no average loss of 25 or more decibels at the 500, 1000, 2000, and 3000 Hertz (Hz) levels in either ear with no single frequency loss in excess of 40.

OTITIS MEDIA, ITITIS EXTERNA, AND MASTOIDITIS

If the candidate meets Hearing Acuity guidelines and the condition is resolved or improving under adequate medical care, then the condition is non-disqualifying.

ANY INNER/MIDDLE/OUTER EAR DISORDER AFFECTING EQUILIBRIUM, E.G. MENIERE'S DISEASE OR SYNDROME

If the candidate has a history of persistent or recurrent vertigo, he/she must receive further evaluation and may be disqualified.

Examples of Essential Tasks Requiring Hearing Acuity:

- 1) Conduct searches in low light or dark
- 2) Use deadly force
- 3) Conduct high risk stops
- 4) Work with loud sounds from multiple directions
- 5) Operate emergency vehicles at high speeds
- 6) Control crowds, domestic conflict, etc.
- 7) Control traffic, etc.

THE EXAMINER SHALL NOTE ANY ADDITIONAL CONDITION(S) OR MEDICATION PROFILE(S) THAT MAY INTERFERE WITH THE CANDIDATE'S ABILITY TO PERFORM ANY OF THE ESSENTIAL TASKS OF THE LAW ENFORCEMENT OFFICER'S JOB.

These may include:
