This two-day Social Media & Open Source Investigations course is designed to equip law enforcement officers with the necessary skills and knowledge to gather information from publicly available sources, such as social media, websites, and other online platforms. The course will cover a range of topics, including the legal and ethical considerations involved in conducting social media & Open Source (OSINT) investigations, the identification and evaluation of online sources, and the use of specialized tools and techniques for data analysis and verification. Participants will learn how to leverage social media platforms to identify and track criminal activity, monitor threat indicators, and gather evidence for investigations.

Throughout the training, officers will be encouraged to practice their skills through hands-on exercises and case studies, enabling them to develop a practical understanding of how to use social media and OSINT in real-world scenarios.

TOPICS INCLUDE:

Students will be given a FREE list of investigative resources in the class and shown numerous free databases/resources during the class.

INSTRUCTOR: We only use active law enforcement, who are currently using these techniques in their daily roles as our instructors. By doing this, it keeps the material up to date and immediately applicable for the students. The instructors can use their own active cases to reinforce the techniques taught in the class. You can read all our instructor biographies on our website.
