

911. What's the location of your emergency?

## Start Your Career in Emergency Communications!

SCC and Lincoln's Emergency Communications Center have partnered to launch a comprehensive introductory course for those exploring a future in public safety telecommunications.

This course covers the fundamentals of emergency communication centers, technologies, legal and ethical responsibilities, interpersonal skills, and strategies for managing the unique challenges of the role.

### Why take this course?

Public safety telecommunicators are the first point of contact in critical situations—making a real difference every day. This growing field offers stable employment, competitive pay, and opportunities for advancement in public safety and emergency communications.

Start your journey toward a rewarding career that saves lives and supports your community.

### What you can expect

- Industry expert instructors.
- Skills practice in simulated emergency scenarios.
- Ride-alongs and sit-alongs with first responders.
- Real-world insights from emergency communication professionals.
- Nationally recognized industry certification.
- Certification in Heartsaver® CPR AED, and First Aid.
