Use of Force Instructor Training Program

Designed to give the student the knowledge and skills necessary to successfully design, develop and implement Use of Force training using static, dynamic and interactive training principles. This program has been developed for those law enforcement professionals who train officers in the principles of Use of Force, develop or revise Use of Force policy, and are responsible for review and evaluation of agency Use of Force incidents. It is not designed as an end user course which teaches an individual how to use force correctly. It utilizes adult learning principles as well as problem based training, role-play, lecture and demonstrations to give the student the skills they need to be successful developing and teaching their own training programs related to Use of Force.
